

High-Precision Stainless Steel Coils, Foil & Components

About Us

Phoenix Foils Private Limited, established in 2005, is an ISO 9001:2015 certified company located in Umbergaon, Gujarat, strategically positioned 150 km from Mumbai's seaport. With a state-of-the-art 5-acre facility and world-class production capabilities, we serve clients across India, the Middle East, Europe, South Africa, the USA, and Asia-Pacific.

We specialize in cold rolled stainless steel coils, foils, pressed components, and decorative sheets. With robust technical expertise and stringent quality control, Phoenix Foils delivers consistent, export-grade stainless steel solutions for a wide range of industrial applications

Phoenix follows ESG principles, responsible sourcing, waste reduction, and complies with **ISO 9001:2015, REACH, and RoHS.**

Key Features

Engineering-grade materials

Scalable manufacturing

Customized supply chain support

Timely delivery and ethical practices

Why Phoenix:

In-house coil to component capability

Range of metallurgical grades

Tailor-made specs

Flexible lead times

Proven domestic and global reach

Support from concept to container

Applications

- Oil & Gas
- Refinery
- Chemical
- Cutlery
- Cookware
- Construction
- Heat Exchangers
- Automobiles
- Airports
- Fabrication
- Elevators
- Water Treatment
- Food & Dairy
- Pulp & Paper

Production capabilities:

Cold Rolled Coils/Foils or Strips:

Thickness; Width	3.00 down to 0.03 mm; 3 – 810 mm
Grades	300-, 400-, 200- series, 904L, Duplex, Super Duplex, High Nickel Alloys, Blade Steel, High/Medium/Low carbon steel, other grades
Hardness	Soft, Quarter-, Half-, Full- Hard materials; Hardened and Tempered
Finish	2D/2B/BA as rolled or degreased
Flatness (Strip)	Best-in-class = Up to 11 units (using Redex Tension Leveller)

Pressed components:

Mass transfer	Random Packing of various types and sizes viz. Pall Rings; IMTP; Cascade, etc.
Various	Metals inserts used in injection moulding; clamps; washers; gaskets; etc.

Special Finish sheets:

4K/8K	Thickness: 3 – 0.40/0.60 mm; Width: 1,250 mm; Length: Coil-Coil/4,000 mm
PVD	Thickness: 3 – 0.40 mm; Width: 1,500 mm; Length: 3,000 mm

Infrastructure

Plant Area:

1,60,000 sq. ft.

Testing:

In-house labs for physical & chemical tests

Annual Capacity:

Cold Rolling: 24,000 tons,
Pressed Components: 3,600 tons,
Special Finish: 24,000 tons

Logistics:

Proximity to Nhava Sheva and Gujarat ports

Main equipment:

- 20-Hi, 6-Hi Reversible Mills with AGC
- Bell and Bright Annealing Furnaces
- Precision Slitters and edging
- Redex Tension Leveller for best-in-class strip flatness up to 11 units
- Industrial Presses for Pressed components
- Special Finish sheets Laser cut or CNC ready in durable decorative colours
 - No.4 – Hair Line and Scotch Brite
 - No.8 – Mirror Finish
 - Physical Vapour Deposition (PVD) Titanium, Rose Gold, Gold, Black, Antique Copper, Violet, Champagne, Green and more.
